

Every Fisherman Needs a Bucket
Durable and Tough

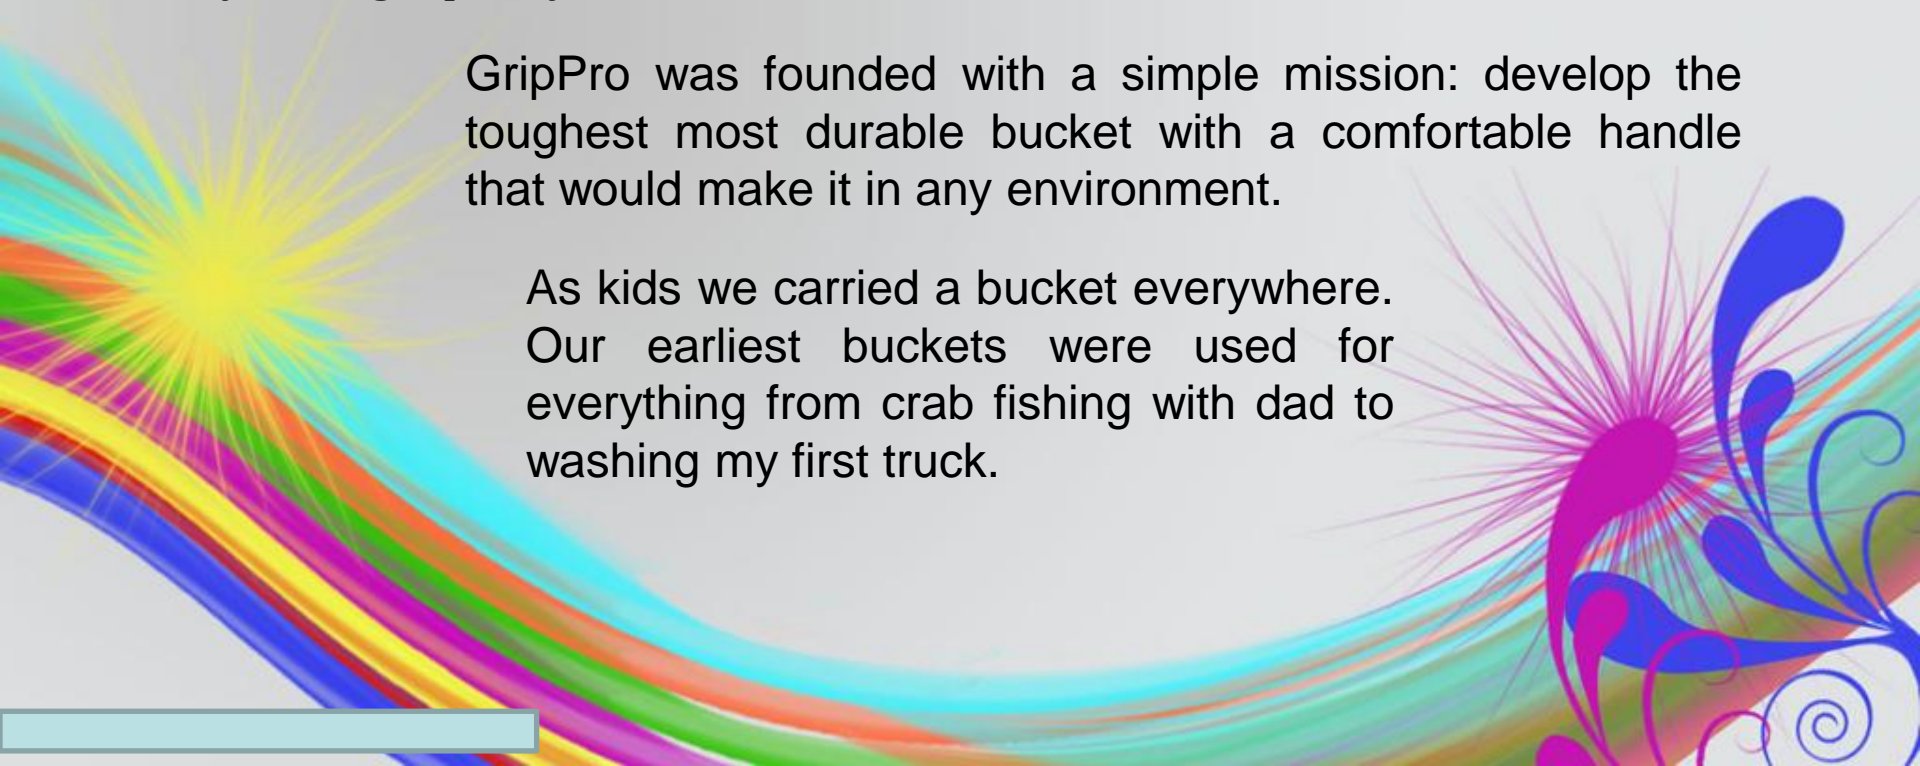

Flex Five Gallon Bucket

Flex Five Gallon Bucket

The GripPro Bucket is tough, comfortable and durable. GripPro is an innovative, custom rope handle bucket. The handle is double braided rope woven exclusively for GripPro here in the USA. Components of the GripPro rope handle bucket are machined from billet aluminum and anodized. With this combination of strength and protection the GripPro rope handle bucket can withstand the cruelest environments. The GripPro rope handle bucket is tough yet comfortable, it is stackable and shatterproof. GripPro has set a new standard for stylish high quality buckets.

GripPro was founded with a simple mission: develop the toughest most durable bucket with a comfortable handle that would make it in any environment.

As kids we carried a bucket everywhere. Our earliest buckets were used for everything from crab fishing with dad to washing my first truck.

Years later buckets are still important. Have you ever reached for a bucket only to realize the handle is broken or the bucket is cracked? Cheap buckets break. Replacing a bucket every time it fails is a hassle.

Products
