

The Yellow Rack™

- *Protect Your Cargo**
- *Comply with CSA 2010**
- *Reduce Injuries**
- *Save Drivers Time**
- *Stop Wasting Money**

What is the Yellow Rack ?

- A compact, convenient storage solution for cargo load bars and straps
- Insures CSA 2010 compliance
- Conceived and patented by a driver
- Huge cost and time savings
- Labor and back-saving device

The Cost:

- 1) Freight companies pay for lost or damage bars and straps – turnover rates can range from **15% to 50%** per year
- 2) Because the restraint equipment is lost or simply inconvenient to use, it is not doing the job it is supposed to do – preventing cargo damage and minimizing claims
- 3) Failure to use cargo restraint equipment directly results in higher insurance costs
- 4) Without the **Yellow Rack**, load bars and straps create OSHA hazards that can cost you money

The Solution:

The **Yellow Rack** is the **perfect tool for the job**, combining the traits the trucking industry looks for in its equipment:

- **Convenience**
- **Security**
- **Utility**
- **Toughness**
- **Reasonable Price**
- ***Ease to use compared to straps***

BENEFITS OF THE YELLOW RACK

- Make your drivers responsible for losing and not using cargo restraint equipment
- Stop paying for the same load bars and straps
- Ensure that your drivers will use cargo restraint equipment
- Increase driver efficiency
- Prevent escalating claims costs for damaged freight
- Stop paying heavy fines
- Keep insurance premiums in check
- Reduce workers' compensation claims and the risk of personal injury litigation
